Learn how we count contributions.

Less More

This is your **contribution graph**. Your first  is for joining GitHub and you'll earn more as you make **additional contributions**. More contributions means a darker green square for that day. Over time, your chart might start looking **something like this**.

We have a quick guide that will show you how to create your first repository and earn more green squares!

Windows taskbar: Ask me anything, 2:31 PM 1/21/2017

The screenshot shows a web browser window with multiple tabs. The active tab is the GitHub repository page for `Campbell-Lang/cmpt220lang`. The page header includes the repository name, a search bar, and navigation links for Pull requests, Issues, and Gist. Below the header, there are buttons for Watch (0), Star (0), and Fork (0). The main content area is titled "Quick setup — if you've done this kind of thing before" and provides instructions for cloning the repository. It includes a "Set up in Desktop" button, a "HTTPS" button, and an SSH button with the URL `https://github.com/Campbell-Lang/cmpt220lang.git`. Below this, it says "We recommend every repository include a README, LICENSE, and .gitignore." The next section is titled "...or create a new repository on the command line" and shows a code block with the following commands:

```
echo "# cmpt220lang" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/Campbell-Lang/cmpt220lang.git
git push -u origin master
```

The final section is titled "...or push an existing repository from the command line" and shows the following commands:

```
git remote add origin https://github.com/Campbell-Lang/cmpt220lang.git
git push -u origin master
```

The Windows taskbar is visible at the bottom, showing the Start button, a search bar, and several application icons. The system clock in the bottom right corner shows 2:36 PM on 1/21/2017.
